Comments

COMMENT:

Persistent proteinuria that results in urine protein: creatinine ratios >0.5 in dogs and >0.4 in cats - in which pre-and post-renal proteinuria has been ruled out - are consistent with glomerular or tubularinterstitial chronic kidney disease.

VETERINARY INTERPRETATION:

No significant renal proteinuria at this point Andrea.

Amy L. Weeden, DVM, DACVP

Opinions and interpretations of test results expressed in this report are outside the scope of the laboratory's terms of accreditation.

Urine Protein Creatinine Ratio performed and reported by Gribbles Veterinary, Carbine Rd, Auckland

Reference Ranges and Method Reference will be supplied on request

Testing Requested

1 x Urine Protein Creatinine Ratio
