GRADING

The grade given is based on the amount of arthritis in each joint. Arthritis indicates elbow dysplasia is present. Grades range from 0 (free of arthritis) to 3 (severe arthritis). Please refer to the explanatory sheet entitled 'Interpretation of Grades' for a full explanation. This is available from your veterinarian or the New Zealand Veterinary Association. Statistics for each breed evaluated are printed from time to time in the New Zealand Kennel Gazette.

ASSESSMENT (for scrutineer use only)

	RIGHT FORE	LEFT FORE
Grade	<u>0</u>	<u>0</u>
Status	DYSPLASTIC	ACCREDITED
Comments	<u>NO</u>	<u>YES</u>

I HEREBY CERTIFY that the above-named animal was examined under the rules of the NZVA Elbow Dysplasia Scheme.
