Patellar Examination R	esuits		3. Classification of luxation			
1. Normal right le	Foliaft		Grade 1 - The patella easily luxates manually at full extension			
2. Patellar Luxation				of the stifle joint, but returns to the trochlea when released.		
bilateral			Grade 2 - There is frequent patellar luxation which, in some			
	right left lateral		cases becomes more or le	ss permanent.		
☐ luxated ☐ m			Grade 3 - The patella is permanently luxated with torsion of th			
					with torsion of th	
	termittent 2 months	permanent 2-6 months	tibia and deviation of the	tibial crest of betw	with torsion of th	
☐ age of onset ☐ <	termittent 2 months 12 months	2-6 months > 12 months	and 50 degrees from the	tibial crest of betw cranial/caudal plan	with torsion of th een 30 degrees e.	
☐ age of onset ☐ <	2 months	2-6 months	and 50 degrees from the Grade 4 - The tibia is med show further deviation m	tibial crest of betw cranial/caudal plan ially twisted and the edially with the res	with torsion of the een 30 degrees e. e tibial crest may ult that it lies 50	
☐ age of onset ☐ <	2 months	2-6 months	and 50 degrees from the Grade 4 - The tibia is med	tibial crest of betw cranial/caudal plan ially twisted and the edially with the res	with torsion of the een 30 degrees e. e tibial crest may ult that it lies 50	
age of onset	2 months 12 months	2-6 months > 12 months	and 50 degrees from the Grade 4 - The tibia is med show further deviation m degrees to 90 degrees fro ABS procedure	tibial crest of betw cranial/caudal plan ially twisted and the edially with the res on the cranial/caud	with torsion of the een 30 degrees e. e tibial crest may ult that it lies 50 al plane.	
age of onset	2 months 12 months	2-6 months > 12 months	and 50 degrees from the Grade 4 - The tibia is med show further deviation m degrees to 90 degrees from ABS procedure I DID NOT verify tattoo/microck	tibial crest of betw cranial/caudal plan ially twisted and the edially with the res im the cranial/caud nip information on	with torsion of the een 30 degrees e. e tibial crest may ult that it lies 50 al plane.	
age of onset	2 months 12 months on was performed ip information or	2-6 months > 12 months	and 50 degrees from the Grade 4 - The tibia is med show further deviation m degrees to 90 degrees fro ABS procedure	tibial crest of betw cranial/caudal plan ially twisted and the edially with the res im the cranial/caud nip information on	with torsion of the een 30 degrees e. e tibial crest may ult that it lies 50 al plane.	
age of onset	2 months 12 months on was performed ip information or	2-6 months > 12 months	and 50 degrees from the Grade 4 - The tibia is med show further deviation m degrees to 90 degrees from ABS procedure I DID NOT verify tattoo/microch	tibial crest of betw cranial/caudal plan ially twisted and the edially with the res im the cranial/caud nip information on	with torsion of the een 30 degrees e. e tibial crest may ult that it lies 50 al plane.	
age of onset	2 months 12 months on was performed ip information or	2-6 months > 12 months descording to the particular this dog	and 50 degrees from the Grade 4 - The tibia is med show further deviation m degrees to 90 degrees from ABS procedure I DID NOT verify tattoo/microch	tibial crest of betw cranial/caudal plan ially twisted and the edially with the res im the cranial/caud nip information on	with torsion of the een 30 degrees e. e tibial crest may ult that it lies 50 al plane.	
age of onset	2 months 12 months on was performed ip information on order	2-6 months > 12 months d according to the athis dog \$5.00\$35.00	and 50 degrees from the Grade 4 - The tibia is med show further deviation m degrees to 90 degrees from the show further deviation models. ABS procedure I DID NOT verify tattoo/microck 12 0+0 20 Date: (Date/Month/	tibial crest of betw cranial/caudal plan ially twisted and the edially with the res on the cranial/caud nip information on Year)	with torsion of the een 30 degrees e. e tibial crest may ult that it lies 50 al plane.	
age of onset	2 months 12 months on was performed ip information on order	2-6 months > 12 months d according to the athis dog \$5.00\$35.00	and 50 degrees from the Grade 4 - The tibia is med show further deviation m degrees to 90 degrees from ABS procedure I DID NOT verify tattoo/microch	tibial crest of betw cranial/caudal plan ially twisted and the edially with the res on the cranial/caud nip information on Year)	with torsion of the een 30 degrees e. e tibial crest may ult that it lies 50 al plane.	
age of onset	2 months 12 months on was performed ip information on order	2-6 months > 12 months d according to the athis dog \$5.00\$35.00	and 50 degrees from the Grade 4 - The tibia is med show further deviation m degrees to 90 degrees from the show further deviation models. ABS procedure I DID NOT verify tattoo/microck 12 0+0 20 Date: (Date/Month/	tibial crest of betw cranial/caudal plan ially twisted and the edially with the res on the cranial/caud nip information on Year)	with torsion of the een 30 degrees e. e tibial crest may ult that it lies 50 al plane.
