				Total score (maximum 106)

Section A (Conformation): Whilst the ideal score is 0, a score of 2 or less per hip is acceptable. This component of the score indicates the severity of the joint incongruity. This, together with joint laxity represents the functional abnormalities

Section B (Secondary Degenerative Change): The ideal score is 0. This section reflects the extent of secondary degenerative joint disease changes.

A guide to the scoring system and its interpretation is available on the NZVA website: www.vetspace.org.nz

I HEREBY CERTIFY that the above-named animal was examined under the rules of the NZVA Hip Dysplasia Scheme.
