Test Report

Owner's Name and Address

Susan Eberhardt
16520 Fox Glen Road
Riverside, CA 92504
USA

Report Method: Email

saddlehil@aol.com

Registered Name: Saddlehill Struttin in the Moonlight

Call Name: Moonlight

Breed: Labrador Retriever

Date of Birth: September 13, 2000

Gender: Male

Optigen Accession #: 02-3631

Registration #: SN777129/01

Tattoo/Chip #: 026 309 885

Test Performed: prcd test 3 for PRA

Test Results: Pattern/Genotype A1

Risk Group: Normal

Risk for developing prcd form of PRA: Pattern A1 dogs are statistically normal for prcd-PRA and are not expected to develop this disease or pass it to offspring. No known Pattern A1 dog has developed prcd-PRA or produced prcd-PRA-affected offspring, and no known prcd-PRA-affected dog has tested Pattern A1. There is a low theoretical chance that a Pattern A1 dog could have a false negative result and therefore be a carrier (risk is less than 0.5%) or even be affected (risk is less than 0.0025%). But, false negative results have not yet been observed with the current OptiGen test. So far, the only inherited PRA disease documented in this breed is the prcd form of PRA.

Significance for breeding: Pattern A1 dogs can be bred to any dog and, with at least 99.5% confidence, will not produce pups affected by the prcd form of PRA.
